

PRESS RELEASE     April 04, 2019

Stockholm, Sweden, Corpus Data & Image Analysis AB, announces sales and increased attention for the DermaProbe™ system, an AI (Artificial Intelligence) based software platform for advanced handling of analytics with various spectroscopy and imaging data for skin diagnostics. Three systems have now been sold and delivered for dermatology research clinics in Sweden.

DermaProbe™ is a handheld diagnostic device that works in combination with an analytical software tool that features a wide array of applications. For instance, quick and early diagnostics of malignant melanoma but also for diabetes induced neuropathy examinations.

What is unique with DermaProbe™ is Corpus' AI technology embedded in a scheme of analytics that enables clinicians with only little training to diagnose various skin diseases such as malignant melanoma, thereby saving time for both patients and physicians. DermaProbe™ is intended for various medical applications and can be included in a total software solution.

#### About Corpus

Corpus Data & Image Analysis AB (private) develops efficient systems to support early detection and diagnosis of various skin cancer such as Malignant outcomes of melanoma, basal cell carcinoma and squamous cell carcinoma.

Corpus expertise and solutions is based on complex data analysis from multivariate and hyperspectral spectroscopic measurements as well as development of proprietary AI (Artificial Intelligence) solutions.

The company's customers are primary- and specialist care, researchers, occupational health care, hospitals and health care centers. The aim is also to reach out to the advanced pharmacy market.

Corpus is a Swedish Med Tech R&D company. With DermaProbe™ Corpus now brings the project into a commercializing phase. The project has shown to be the most effective, affordable and reliable skin diagnostics tool in the industry.

“Our advancement of Corpus' new platform will solve many difficult tasks in the diagnostic skin area” says Gunilla Nordström, CEO of Corpus.
